

# Mobility Programme

Part of the Development service area of EA, an award-winning design team focusing on inclusive adventure and sports equipment. Our in-depth research combined with worldwide expeditions and field trials of single-user pilot projects form the foundation for 'barrier free' industrial design solutions. This people-centred approach ensures that disabled athletes and coaches are meaningfully involved throughout the design and development process.

## Description

The Mobility program addresses the needs of outdoor practitioners and athletes in the area of safe handling techniques. The program includes training modules which promote best practice and equipment solutions which facilitate safe and dignified moving and handling for a range of athletes in a wide variety of outdoor environments.

## Portable Lifting System

### Part of the Mobility program

The Mobility program addresses the needs of outdoor practitioners and athletes in the area of safe handling techniques. The program includes training modules which promote best practice and equipment solutions which facilitate safe and dignified moving and handling for a range of athletes in a wide variety of outdoor environments.

## Product Description

The CanGO hoist, from EA, is a modular lifting frame system designed to provide flexible lifting solutions in domestic, centre and expedition/travel environments. The frame can be configured at a variety of heights and sizes dependant on user, activity and environmental constraints.

## Uses

- Supports activity and daily living tasks indoors and outside
- No installation needed, resulting in multi-site use
- Extended reach beyond Quay-side without need for permanent fixing
- User posture can be adjusted in use, reducing the need to adjust when seated
- Packed size 30 x 30 x 100cm; splits into easy-carry sections of less than 5Kg

## Features

- Height and width adjustable portable frame
- Individually adjustable leg length for uneven ground
- Manually operated winch (limited to 120kg)
- Complies with relevant EU Standards (BS-EN-ISO 10535; Loler regulations; CE-Marked)
- Storage and carry bag - for easy transportation
- Complete user guide

## ManGO Assist Sling

### Part of the Mobility program

The Mobility program addresses the needs of outdoor practitioners and athletes in the area of safe handling techniques. The program includes training modules which promote best practice and equipment solutions which facilitate safe and dignified moving and handling for a range of athletes in a wide variety of outdoor environments.

### Description

The ManGO sling is designed for use with the CanGO portable lifting system. The unique attachment method enables adjustment of the user position during a lift. In this way the sitting posture can be set before the user is lowered onto a seat, reducing the need for secondary lifting tasks.

### Uses

- Use with CanGO portable lifting system in indoor and outdoor environments
- Use with ManGO Handles for assisted lifts

### Features

- Padded body available in three sizes (SML)
- Colour coded straps for ease of use with the CanGO spreader bar
- Handles at hips and back for manoeuvring when hanging
- Strap length adjustable during use
- Length indicators on straps simplify adjustment process
- Machine washable
- Please enquire about the Bathroom sling
